No part of this publication may be reproduced or transmitted in any form or by any means, electronic or mechanical, including photocopy, recording, or any information storage and retrieval system, without permission in writing from the copyright owner.

The appearance of the code at the bottom of the first page of an article in this journal indicates the copyright owner's consent that copies of the article may be made for personal or internal use, or for the personal or internal use of specific clients. This consent is given on the condition, however, that the copier pay the stated per copy fee through the Copyright Clearance Center, Inc. (21 Congress Street, Salem, Massachusetts 01970), for copying beyond that permitted by Sections 107 or 108 of the U. S. Copyright Law. This consent does not extend to other kinds of copying, such as copying for general distribution, for advertising or promotional purposes, for creating new collective works, or for resale. Copy fees for pre-1982 articles are the same as those shown for current articles.

MADE IN THE UNITED STATES OF AMERICA

CONTENTS OF VOLUME 218

NUMBER 1, OCTOBER 1, 1982

BIOLOGICAL OXIDATION AND BIOENERGETICS

- Reaction of Iron-EDTA Chelates with the Superoxide Radical
John Butler and Barry Halliwell 174
- The Interaction of Cyanocobalamin and Some of Its Analogs with Manganese
 (II) and Gadolinium (III) *Gerald T. Bratt and Harry P. C. Hogenkamp* 225

ENZYME MECHANISMS AND METABOLISM

- Equilibrium Constants under Physiological Conditions for the Reactions of the
 Nonphosphorylated Pathway of L-Serine Biosynthesis *Robert W. Guynn* 14
- Polymer-Protomer Transition of Acetyl-CoA Carboxylase as a Regulator of Li-
 pogenesis in Rat Liver *B. Amy Clarke and Steven D. Clarke* 92
- Catalytic and Kinetic Properties of Purified High-Affinity Cyclic AMP Phospho-
 diesterase from Dog Kidney *Paul M. Epstein, Samuel J. Strada,
 Kolachana Sarada, and W. Joseph Thompson* 119
- Rat Intestinal Brush Border Membrane Dipeptidyl-Amino-peptidase IV: Kinetic
 Properties and Substrate Specificities of the Purified Enzyme
Agustin M. Bella, Jr., Roger H. Erickson, and Young S. Kim 156
- Involvement of Arginine Residues in Catalysis by Rat Brain Hexokinase
John E. Wilson 254
- Sodium-Dependent Activation of Intestinal Brush-Border Sucrase: Correlation
 with Activation by Deprotonation from pH 5 to 7
Monique Vasseur, Charles Tellier, and Francisco Alvarado 263
- L-Myoinositol-1-phosphate Synthase from *Neurospora crassa*: Purification to
 Homogeneity and Partial Characterization
J. E. Escamilla, M. Contreras, A. Martínez, and M. Zentella-Piña 275
- Cysteine Thiosulfonate in Cystine Metabolism
J. H. Fellman and Nancy A. Avedovech 303

HORMONE STRUCTURE AND FUNCTION

- 25-Hydroxy-26,26,26,27,27,27-Hexafluorovitamin D₃: Biological Activity in the
 Rat *Y. Tanaka, D. N. Pahuja, J. K. Wichmann, H. F. De Luca,
 Y. Kobayashi, T. Taguchi, and N. Ikekawa* 134

LIPIDS

- Purification and Characterizations of β -Ketoacyl-[Acyl-Carrier-Protein] Reduc-
 tase, β -Hydroxyacyl-[Acyl-Carrier-Protein] Dehydrase, and Enoyl-[Acyl-
 Carrier-Protein] Reductase from *Spinacia oleracea* Leaves
Takashi Shimakata and Paul K. Stumpf 77
- The Effect of Coenzyme A and Structurally Related Thiols on the Mammalian
 Fatty Acid Synthetase *Stuart Smith* 249

MEMBRANE STRUCTURE AND FUNCTION

- Multiple Expressions of the Activity of Guanine Nucleotide Regulatory Protein
in Human Thyroid Adenylate Cyclase
Sania Amr, Pierre Carayon, and Michael C. Lin 8
- 1,1-Dichloroethylene Inhibition of Liver Microsomal Calcium Pump *In Vitro*
Prabhathi Ray and Leon Moore 26
- Evidence for Two Protein Kinases Associated with the Surface Membranes of
L-929 Cells
Charles L. Patterson, Jr., and Jay C. Brown 240

NEUROCHEMISTRY

- Isolation and Structure of a Peptide Toxin from the Marine Snail *Conus magus*
M. McIntosh, L. J. Cruz, M. W. Hunkapiller, W. R. Gray, and B. M. Olivera 329

OXYGENASES, MICROSOMES, AND P-450 REACTIONS

- The Formation of *N*-Alkylprotoporphyrin IX and Destruction of Cytochrome
P-450 in the Liver of Rats after Treatment with 3,5-Diethoxycarbonyl-1,4-
Dihydrocollidine and Its 4-Ethyl Analog
B. L. Coffman, G. Ingall, and T. R. Tephly 220

PHOTOSYNTHESIS AND PLANT BIOCHEMISTRY

- In Vitro* Characterization of the *Ac* Locus in White Clover (*Trifolium repens* L.)
David B. Collinge and M. A. Hughes 38
- Reexamination of the Interaction between Ferredoxin:NADP Reductase and
NADP
John Dykes and Dan J. Davis 46
- Protein Phosphorylation and Excitation Energy Distribution in Normal, Inter-
mittent-Light-Grown, and a Chlorophyll *b*-less Mutant of Barley
Philip Haworth, David J. Kyle, and Charles J. Arntzen 199
- Protoporphyrinogen Oxidation in Chloroplasts and Plant Mitochondria, a Step
in Heme and Chlorophyll Synthesis
J. M. Jacobs, N. J. Jacobs, and A. E. De Maggio 233
- Synthesis of Proteins by Chloroplasts from Iron-Deficient *Euglena gracilis*
John J. Gaynor 309

PHYSICAL BIOCHEMISTRY AND PHYSICAL CHEMISTRY OF MACROMOLECULES

- Interactions of Calcium with the Pyridine Nucleotides
R. Kenneth Burkhard 207
- A Deuteron and Proton Magnetic Resonance Relaxation Study of β -Lactoglobulin
A Association: Some Approaches to the Scatchard Hydration of Globular
Proteins
Thomas F. Kumosinski and Helmut Pessen 286

POLYSACCHARIDES AND COMPLEX CARBOHYDRATES

- Structures of Carbohydrate Units Isolated from Trout Egg Polysialoglycoproteins:
Short-Cored Units with Oligosialosyl Groups
*Hiroshi Nomoto, Mariko Iwasaki, Toshiya Endo, Sadako Inoue,
Yasuo Inoue, and Go Matsumura* 335

PROTEIN STRUCTURE, FUNCTION AND TURNOVER

Cardiotoxins from the Venom of Malayan Cobra (<i>Naja naja sputatrix</i>)	<i>Nget-Hong Tan</i>	51
A Reagent for Covalently Attaching Biotin to Proteins via a Cleavable Connector Arm	<i>Catharine A. Mouton, Dennis Pang, C. V. Natraj, and Jules A. Shafer</i>	101
The pH Dependence of Apparent Binding Constants between Apo-Superoxide Dismutase and Cupric Ions	<i>Junzo Hirose, Tomoko Ohhira, Hayami Hirata, and Yoshinori Kidani</i>	179
A Structural Comparison of the Subunits of the <i>Dolichos biflorus</i> Seed Lectin by Peptide Mapping and Carboxyl Terminal Amino Acid Analysis	<i>Daniel M. Roberts, Jeffery Walker, and Marilyn E. Etzler</i>	213
The Interaction of Zinc, Nickel and Cadmium with Serum Albumin and Histidine-Rich Glycoprotein Assessed by Equilibrium Dialysis and Immunoabsorbent Chromatography	<i>Sandra L. Guthans and William T. Morgan</i>	320

PROTEIN SYNTHESIS

Effect of Cytosol on Mitochondrial Protein Synthesis <i>in Vitro</i> during Cardiac Hypertrophy	<i>C. Thirunavukkarasu, S. Meenakshi, and C. Rajamanickam</i>	163
---	---	-----

REGULATION OF METABOLISM AND OF ENZYME ACTION

Phosphorylation of Glycogen Synthase by Cyclic AMP-Independent Glycogen Synthase Kinase-1 (GSK-1): A Comparative Study with Cyclic AMP-Dependent Protein Kinase and Phosphorylase Kinase	<i>Jordi Vila, Agustí Salavert, Emilio Itarte, and Joan J. Guinovart</i>	1
The Reversible Phosphorylation of Isocitrate Dehydrogenase of <i>Salmonella typhimurium</i>	<i>Jean Yin Jen Wang and Daniel E. Koshland, Jr.</i>	59
Changes in pH Sensitivity of Adenylate Cyclase Specifically Induced by Fluoride and Vanadate	<i>Roger A. Johnson</i>	68
Characterization of Calmodulin-Mediated Phosphorylation of Cardiac Muscle Sarcoplasmic Reticulum	<i>Charles F. Louis and Mark Maffitt</i>	109
Mechanism of the Control of Pulmonary and Hepatic Fatty Acid Synthesis by the Thyroid Hormones	<i>Dipak K. Das and Manik Ganguly</i>	142
Regulation of the Betaine Content of Rat Liver	<i>James D. Finkelstein, John J. Martin, Barbara J. Harris, and Walter E. Kyle</i>	169
Purification and Properties of Heme-Deficient Hepatic Soluble Guanylate Cyclase: Effects of Heme and Other Factors on Enzyme Activation by NO, NO-Heme, and Protoporphyrin IX	<i>Eliot H. Ohlstein, Keith S. Wood, and Louis J. Ignarro</i>	187

STRUCTURAL PROTEINS

Characterization of a Signal Peptide Sequence in the Cell-Free Translation Product of Sheep Elastin mRNA	<i>Jeffrey M. Davidson, Barbara Leslie, Terry Wolt, Ronald G. Crystal, and Lawrence B. Sandberg</i>	31
--	---	----

NOMENCLATURE ANNOUNCEMENTS

IUPAC-IUB Joint Commission on Biochemical Nomenclature (JCBN)	
Nomenclature of Vitamin D: Recommendations 1981	342
IUPAC-IUB Joint Commission on Biochemical Nomenclature (JCBN)	
Nomenclature of Tocopherols and Related Compounds: Recommendations 1981	347
ERRATUM	
Volume 216, Number 2, July 1982: Reynold Spector, "Nucleoside Transport in Choroid Plexus: Mechanism and Specificity," pp. 693-703	349

NUMBER 2, OCTOBER 15, 1982

INVITED PAPER

Siderophore Production by Phytopathogenic Microbial Species	
<i>Sally A. Leong and J. B. Neilands</i>	351

COMMUNICATIONS

On the Mechanism of Inhibition of Fructose 1,6-Bisphosphatase by Fructose 2,6-Bisphosphate	
<i>S. Pontremoli, E. Melloni, M. Michetti, F. Salamino, B. Sparatore, and B. L. Horecker</i>	609
Synthesis of Monoterpene Hydrocarbons from [1- ³ H]Linalyl Pyrophosphate by Carbocyclase from <i>Citrus limonum</i>	
<i>Gloria Portilla, M. Cecilia Rojas, Liliana Chayet, and Osvaldo Cori</i>	614
The Inhibition of a Chromatin-Bound Proteolytic Activity	
<i>Robert C. Krueger</i>	619
Reconstitution of Glucose Dehydrogenases Using Synthetic Methoxatin	
<i>C. G. Kilty, K. Maruyama, and H. S. Forrest</i>	623
S' ₂ -P' ₂ Interaction and the Trypsin Anilide Hydrolysis	
<i>Evd. Christova, D. D. Petkov, and Iv. Stoineva</i>	626

BIOCHEMICAL GENETICS AND CELLULAR DIFFERENTIATION AND DEVELOPMENT

Occurrence of NI and NII Type Protein Kinases in the Nuclei from Various Tissues of the Rat	
<i>Yasutaka Yutani, Yoko Tei, Munehiko Yukioka, and Akira Inoue</i>	409

BIOLOGICAL OXIDATION AND BIOENERGETICS

The Multiple Effects of Ethylenediaminetetraacetate in Several Model Lipid Peroxidation Systems	
<i>Ming Tien, Lee A. Morehouse, John R. Bucher, and Steven D. Aust</i>	450
Reaction of Ozone with Lysozyme under Different Exposure Conditions	
<i>M. M. Dooley and J. B. Mudd</i>	459
Comparison of Cytochromes P-450 with High Activity toward Benzo[a]pyrene Purified from Liver Microsomes of β -Naphthoflavone and 3-Methylcholanthrene-Pretreated Rats	
<i>Paul P. Lau, Cecil B. Pickett, Anthony Y. H. Lu, and Henry W. Strobel</i>	472
The Stimulation of the Release of Ca ²⁺ from Mitochondria by Sodium Ions and Its Inhibition	
<i>Eric J. Harris and James J. A. Heffron</i>	531

- Different Behaviors of Benznidazole as Free Radical Generator with Mammalian and *Trypanosoma cruzi* Microsomal Preparations
Silvia N. J. Moreno, R. Docampo, R. P. Mason, W. Leon, and A. O. M. Stoppani 585

ENZYME MECHANISMS AND METABOLISM

- Anthranilate Synthase of *Neurospora crassa*: Reaction and Labeling with Glutamine Analogs
James L. Paukert, Jack Henkin, Joseph Keesey, Jr., and John A. DeMoss 443
- Kinetic Differences between Two Interconvertible Forms of Fructose-1,6-bisphosphatase from *Saccharomyces cerevisiae*
Juana M. Gancedo, María J. Mazón, and Carlos Gancedo 478
- Activity Associated with Individual Subunits of Pig Heart NAD-Specific Isocitrate Dehydrogenase
Selma Hayman and Roberta F. Colman 492
- Studies on the Binding of Nucleotides by Rat Brain Hexokinase
Madhulika Baijal and John E. Wilson 513

IMMUNOLOGY

- Relationship between Epitope Density and Immunoprecipitation of Multivalent Antigens by Bivalent Antibody: Immunoprecipitation of Adenylylated Glutamine Synthetase by Anti-AMP Antibodies
Robert J. Hohman and Earl R. Stadtman 548

LIPIDS

- Role of Spermidine in the Activity of *sn*-Glycerol-3-phosphate Acyltransferase from *Escherichia coli*
David S. Vallari and Charles O. Rock 402

MEMBRANE STRUCTURE AND FUNCTION

- Anesthetic-Ion Channel Interactions: The Effect of Lidocaine on the Stability and Transport Properties of the Membrane-Spanning Domain of Band 3
Stephen R. Davio and Philip S. Low 421
- A Mg^{2+} -Stimulated ATPase in Platelet α -Granule Membranes: Possible Involvement in Proton Translocation
Sergio Grinstein and Wendy Furuya 502
- Influence of Membrane Fluidity on Transport Mediated by Ubiquinones through Phospholipid Vesicles
Francisco J. Aranda and Juan C. Gómez-Fernández 525

PHOTOSYNTHESIS AND PLANT BIOCHEMISTRY

- Reduction of Photosystem I Reaction Center, P-700, by Plastocyanin in Stroma Thylakoids from Spinach: Lateral Diffusion of Plastocyanin
Makoto Takano, Masa-aki Takahashi, and Kozi Asada 369
- Purification and Properties of Glutamine Synthetase from the Plant Cytosol Fraction of Lupin Nodules
Derek K. McCormack, Kevin J. F. Farnden, and Michael J. Boland 561

PHYSICAL BIOCHEMISTRY AND PHYSICAL CHEMISTRY OF MACROMOLECULES

- Ultracentrifugation Studies on Early Stage Polymerization of Tobacco Mosaic Virus Protein
Ragaa A. Shalaby, C. L. Stevens, and Max A. Lauffer 384

POLYSACCHARIDES AND COMPLEX CARBOHYDRATES

- Studies on the UDP-Sugar Hydrolases from *Escherichia coli* and *Salmonella typhimurium* *I. R. Beacham and M. S. Wilson* 603

PROTEIN STRUCTURE, FUNCTION AND TURNOVER

- Change in the Intrinsic Fluorescence of Acetylcholine Receptor Purified from *Narke japonica* upon Binding with Cholinergic Ligands *Norio Kaneda, Fumio Tanaka, Michiaki Kohno, Kyoze Hayashi, and Kunio Yagi* 376
- Preparation of the Polypeptides of the Giant Hemoglobin of *Travisia japonica* in Carbon Monoxy Form *K. Fushitani, H. Morimoto, and O. Ochi* 540
- Proteolysis of Human Reticulocyte Membrane Proteins: Evidence for a Physiological Role of the Acid Endopeptidases *Edon Melloni, Bianca Sparatore, Franca Salamino, Mauro Michetti, and Sandro Pontremoli* 579

PROTEIN SYNTHESIS

- In Vitro* Expression of *Escherichia coli* Ribosomal Protein L10 Gene: Tripeptide Synthesis as a Measure of Functional mRNA *Yves Cenatiempo, Nikolaos Robakis, Brian R. Reid, Herbert Weissbach, and Nathan Brot* 572

REGULATION OF METABOLISM AND OF ENZYME ACTION

- The Regulatory Role of Mg^{2+} on Rabbit Skeletal Muscle Phosphorylase Kinase *Toolsee J. Singh, Akira Akatsuka, and Kuo-Ping Huang* 360
- Effects of Ethanol-Derived Acetaldehyde on the Phosphorylation Potential and on the Intramitochondrial Redox State in Intact Rat Liver *Kai O. Lindros and Allan Stowell* 429
- Metabolism of 25-Hydroxycholecalciferol by Kidney Cell Lines *Ronald J. Midgett and André B. Borle* 438
- Phosphate Content of Muscle Phosphofructokinase in the Genetically Diabetic Mouse (C57BL/KsJ) *Sergio E. Bazaes, Lawrence G. Foe, and Robert G. Kemp* 483
- Pathway of Gluconeogenesis from Tagatose in Rat Hepatocytes *Robert Rognstad* 488
- Regulation of α -Fetoprotein and Transferrin Synthesis and Secretion in Mouse Hepatoma Cells *Magda Hernandez Morales and John Papaconstantinou* 592
- AUTHOR INDEX FOR VOLUME 218 630

The Subject Index for Volume 218 will appear in the December 1982 issue as part of a cumulative index for the year 1982.

Instructions to Authors¹

Archives of Biochemistry and Biophysics is an international journal dedicated to the dissemination of fundamental knowledge in all areas of biochemistry and biophysics. Manuscripts are welcome that contain new and significant information of general interest to workers in these fields. Sufficient detail must be included to enable others to repeat the work.

Manuscripts should be written in clear, concise and grammatical English and should be submitted in triplicate (one original and two photocopies), including three sets of figures, to:

Archives of Biochemistry and Biophysics
Editorial Office
111 Fifth Avenue
New York, New York 10003

Failure to receive the required number of copies of the manuscript may delay review. *In the case of rejected manuscripts only one copy of the manuscript will be returned to the author.*

Original papers only will be considered. Manuscripts are accepted for review with the understanding that the same work has not been published, that it is not under consideration for publication elsewhere, and that its submission for publication has been approved by all of the authors and by the institution where the work was carried out. Abstracts of oral or poster presentations are not considered to constitute previous publication. Presentation of material in preliminary communications normally will not preclude publication of a full paper in *Archives*, provided that the full paper contains additional information that justifies its publication and does not repeat the presentation of the same data that supported the preliminary communication. The manuscript should be accompanied by copies of all preliminary communications and of all relevant manuscripts that are in press or under editorial consideration by another journal. Authors must verify the wording of any cited personal communication with the persons who supplied the information and obtain approval for the use of their names in connection with the quoted information or for the citation of unpublished work; written evidence of such approval should accompany the manuscript. All material published in *Archives* represents the opinions of the authors and should not be construed to reflect the opinions of the Editors or the Publisher.

Authors should suggest competent reviewers in their field and may also suggest individuals whom they wish to have excluded from the review process. Contributors will receive decision letters from the Executive Editor. Resubmitted manuscripts and correspondence concerning such manuscripts should be sent to the Executive Editor at the address indicated on the decision letter. Revised manuscripts should be accompanied by a copy of the unrevised version.

Many acceptable papers require minor revision or condensation. It is in the mutual interest of both the authors and the journal that amended manuscripts be returned promptly. A revised paper will retain its original date of receipt only if it is received by the Executive Editor within 2 months of the date of return to the author.

Authors submitting a manuscript do so on the understanding that if it is accepted for publication, copyright in the article, including the right to reproduce the article in all forms and media, shall be assigned exclusively to the Publisher. The Publisher will not refuse any reasonable request by the author for permission to reproduce any of his or her contributions to the journal.

Communications offer a means of early publication of work of such importance that rapid release is warranted. Normally they should not exceed 15 manuscript pages in length (including text, bibliography, tables, and figures). The review and printing of such papers will be expedited to provide earliest possible publication.

Form of Manuscript. Manuscripts should be typewritten and double-spaced throughout on one side of 8.5 × 11-in. white paper, with 1-in. margins on all sides. All pages should be numbered consecutively.

Subject Areas. Authors should specify on page 1 of the manuscript the Subject Area of the article submitted. See the back cover for the listing of the Subject Areas.

Page 1 should contain the article title, author(s), affiliation(s), a short running title (abbreviated form of title) of less than 65 characters including letters and spaces, the appropriate subject category for listing in the Table of Contents, suggestions for index list entries, and the name and complete mailing address (and telephone number if possible) of the person to whom correspondence should be sent.

Page 2 should contain a short abstract of 50–250 words.

Editorial style should conform to the *Handbook for Authors* (American Chemical Society).

Footnotes to the text should be identified by superscript Arabic numerals and should be typed double-spaced on a separate sheet; footnotes to tables should be identified by superscript lowercase italic letters (*^{a,b}*, etc.) and placed at the bottom of the table.

¹ An extended Instructions to Authors is published in the January issue of *Archives of Biochemistry and Biophysics*. Reprints are available from the Editorial Office upon request. Authors should consult the extended Instructions for details on nomenclature, IUPAC–IUB rules and recommendations, and accepted abbreviations.

Tables should be numbered with Roman numerals and cited consecutively in the text. Each table should be titled and typed double-spaced on a separate sheet. Units must be clearly indicated for each of the entries in the table.

Authors can submit complex tables and mathematical material as camera-ready copy. In this way, they are spared multiple, tedious proofreadings and the chance of error is reduced. Tables submitted as camera-ready copy should be typed single spaced whenever possible and preferably submitted as 5 × 7-in. glossy prints.

Figures should be cited consecutively in the text by Arabic numerals. Legends should be typed double-spaced on a separate sheet. All figures and illustrations are to be submitted in such form as to permit photographic reproduction without retouching or redrawing. Line drawings should be professionally drafted and no larger than 8.5 × 11 in. Letters and numbers should be at least $\frac{3}{16}$ in. (4 mm) in height (Leroy lettering size 200). Glossy prints of figures properly prepared are acceptable.

References should be cited in the text by an Arabic numeral in parentheses and listed at the end of the paper in numerical order typed double-spaced on a separate sheet. Abbreviations of journal titles should conform to those of *Chemical Abstracts Service Source Index*, 1969. Please note the following examples.

1. JONES, J. B., DILWORTH, G. L., AND STADTMAN, T. C. (1979) *Arch. Biochem. Biophys.* **195**, 255-260.
2. METZLER, D. E. (1977) *Biochemistry: The Chemical Reaction of Living Cells*, p. 298, Academic Press, New York.
3. HARRINGTON, W. F. (1979) in *The Proteins* (Neurath, H., and Hill, R. L., eds.), Vol. 4, pp. 246-409, Academic Press, New York.

Miniprint supplements are an effective way of presenting supportive data. They are printed from plates made by photographic reduction from typed pages provided by the author. Types of data that have been published as miniprint supplements include analyses relevant to studies of amino acid or polynucleotide sequences, details of chemical syntheses, preparation of enzymes, extended statistical or mathematical discussions, and X-ray diffraction data. The miniprint supplement is published in the journal, immediately following the parent paper, and is included in the reprints. Since the miniprint supplement is produced from camera-ready copy supplied by the authors with no redaction or editorial changes it is important that the copy be letter perfect and conform to the style of the journal. *Authors will not be permitted to make changes to the miniprint supplement at the proof stage. Any changes necessary in the proof must be made as a typeset "Note added in proof."*

Proofs will be sent to the author, with a reprint order form. Authors will be charged for extensive alterations.

Reprints. Fifty reprints of each article will be provided free of charge. Additional reprints may be purchased.
